

SuperFOIL Garage Door Insulation Kit

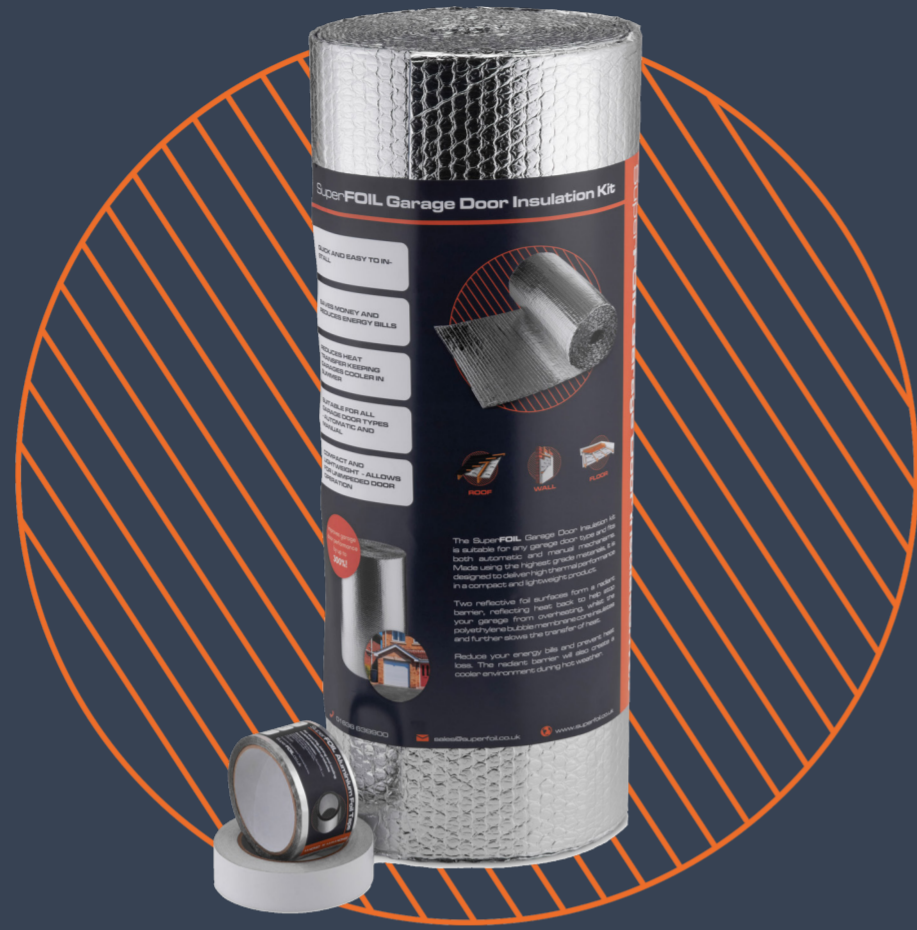

QUICK AND EASY TO INSTALL

SAVES MONEY AND REDUCES ENERGY BILLS

REDUCES HEAT TRANSFER KEEPING GARAGES COOLER IN SUMMER

SUITABLE FOR ALL GARAGE DOOR TYPES - AUTOMATIC AND MANUAL

COMPACT AND LIGHTWEIGHT - ALLOWS FOR UNIMPEDED DOOR OPERATION

Improves garage door performance by up to **300%!**

The SuperFOIL Garage Door Insulation kit is suitable for any garage door type and fits both automatic and manual mechanisms. Made using the highest grade materials, it is designed to deliver high thermal performance in a compact and lightweight product.

Two reflective foil surfaces form a radiant barrier, reflecting heat back to help stop your garage from overheating, whilst the polyethylene bubble membrane core insulates and further slows the transfer of heat.

Reduce your energy bills and prevent heat loss. The radiant barrier will also create a cooler environment during hot weather.

SuperFOIL Garage Door Insulation Kit

Product Dimensions

Thickness	3mm
Length	10m
Width	0.6m
Coverage	6m ²
Weight	1.5kg

Pack contains:

- 1 x Roll of Garage Insulation (0.6m x 10m, 6sqm coverage)
- 1 x Roll of 25mm wide double-sided adhesive tape
- 1 x Roll of 50mm x 20m reflective aluminium tape
- Full installation instructions

Directions for use:

Clean and dry the inside surface of the door. Attach the double-sided tape to the metal frame of the door and cut to correct length. Ensure the complete perimeter is covered and fix multiple lines to cover the full width of the door ensuring each length of foil has 2 or more lines of adhesion.

Measure the width of the door and cut the insulation to fit. Begin at the top corner of the door, peel off the outer layer of the double-sided tape and roll out the insulation horizontally applying pressure onto the tape for 20-30 seconds to ensure the insulation is secure.

Repeat the process until the full height of the door is covered. Overlap the length of each sheet by 50mm and seal the joint with SuperFOIL Aluminium Foil Tape to prevent air movement.

SuperFoil Family:

This product is part of the SuperFOIL Family- reflective insulation solutions that use the latest technology to provide the highest performance in a wide variety of applications.

The assortment includes Multifoil Insulation, Breathable Insulation and Membranes, Bubble Membranes, High Performance Radiant Barriers and Vapour Control Layers, Pipe and Duct insulation, Tapes and Insulation Accessories.
